

# REVOLUTIONIZING GREEN ENERGY STORAGE.

## DOMESTIC BATTERY CELL PRODUCTION.

Our cell manufacturing process uses a unique and patented spray coating technique that is chemistry agnostic and easily scalable with a reduced manufacturing footprint.

## BATTERY PACK DESIGN AND ASSEMBLY.

Our award winning engineering team brings vast knowledge and experience as they focus on improving manufacturing efficiencies and creating the latest in product development.

## SYSTEM INTEGRATION.

With a proven track record and high consumer confidence, we bring seamlessly integrated full energy systems to OEMs.

- Full Power System Integration
- Unbeatable Technical Support & Training

## INNOVATION.

With over 10 years of extensive R&D and 85+ filed and pending patents, our innovation team is focused on the future of battery technology.

- World Class R&D Team
- Robust Patent Portfolio
