Welcome to
Pittman Power:
Shaping a
Brighter Future

Photo: Pittman Power

PITTMAN POWER is a premier provider of engineering and electrical maintenance, repair, and operations (MRO) services. With a strong commitment to safety, reliability, and innovative technology, Pittman Power offers comprehensive solutions across diverse industries, ensuring the seamless operation and modernization of electrical grids and systems.

Our Offerings:

Engineering: We provide a full spectrum of engineering services, including arc flash studies, protective device coordination, and design-build solutions.

Field Services: Our experienced field services technicians provide maintenance and repair for breakers and contactors, relay testing, and comprehensive substation MRO services.

Transformer Services: Pittman Power Electrical Testing delivers extensive transformer maintenance, repair, and diagnostic services.

Motor & Generator Services: Our motor and generator services include repairs, maintenance, and lubrication diagnostics.

I/E Services: We excel in project management, equipment reliability assessments, and electrical installation.

New Equipment Sales: Pittman Power sells and installs high-quality products from leading manufacturers, such as GE, Toshiba, and Siemens.

Markets Served:

Oil & Gas: We support upstream, midstream, and downstream sectors with maintenance and turnaround management.

Utilities: Our team handles power generation, transmission, and

distribution, ensuring compliance with NERC/FERC standards.

Renewables: Our services include comprehensive wind and solar energy solutions, including generator repair and fault analysis.

Commercial & Industrial: Our C&I teams provides services encompassing engineering studies, routine maintenance, and the management of unplanned outages, all designed to ensure safety and reliability.

Commitment to Safety: Safety is the cornerstone of Pittman Power's operations, woven into every aspect of our business. We believe a safe workplace is a fundamental right for every employee, contractor, and partner. Our commitment to safety begins with leadership, who prioritize safety in all decisions and empower every team member to take ownership of their safety and that of others. We adhere to stringent industry safety standards, creating a culture where safety is ingrained in our daily routines. Our comprehensive safety programs include ongoing training, certifications, and regular drills, ensuring preparedness. We conduct thorough risk assessments and hazard analyses before every project, effectively managing potential risks. Pittman Power leverages cutting-edge technology, including advanced monitoring systems and predictive maintenance tools, to prevent safety issues. This proactive approach ensures smooth operations and minimizes incidents, safeguarding our workforce, clients, and the communities we serve.

About Pittman Power:

Pittman Power is a leader in engineering and electrical services, blending decades of experience with

a forward-thinking approach. Our technical expertise and customer-focused solutions allow us to excel in electrical maintenance, repair, and operations (MRO) services. Our skilled team tackles industry challenges with precision, whether modernizing power infrastructure, managing outages, or delivering high-performance services. We continuously invest in our workforce, ensuring our technicians and engineers are equipped with the latest tools and knowledge, which strengthens our leadership in the industry.

Customer satisfaction is at the core of our operations. We collaborate closely with clients to tailor our services, building lasting partnerships based on trust and transparency. Committed to safety and reliability, Pittman Power upholds the highest service standards, ensuring maximum uptime and efficient, long-lasting solutions. In a dynamic industry, we remain dedicated to powering the future with innovation and excellence.
