

Univolt™ transformer oil

The future begins with the current

Univolt transformer oils are formulated to improve performance and extend transformer life:

Up to 2x higher oxidative stability*
Extending service and improving efficiency

More than 100% lower negative gassing*
Reducing equipment failure

Up to 75% less aromatics*
Offering more consistent quality and safety, health and environment benefits

40% lower viscosity at 0°C*
Offering better low temperature performance

Over 5% improvement in thermal properties*
Reducing the risk of premature aging

Improved material compatibility*
Reducing leaks

Undetectable level of corrosive sulfur*
Helping extend transformer life

**Compared to traditional naphthenic-based oils.*
